MONDAY JULY 16.

REPUBLICAN TICKET.

FOR PRESIDENT,
BENJAMIN HARRISON,
OF INDIANA.

FOR VICE PRESIDENT,
LEVI P. MORTON,
OF NEW YORK.

STRANGLING REFORM.

The term of Chief Justice Charles S. Zane expired on the fifth, and the president has appointed Elliott Sanford, a Tammany hall democrat of New York, to be his successor.

Not only has there been no complaint, except from Mormon polygamists, against Judge Zane, but his course as judge has won the general approval of all law-abiding citizens. He has shown himself an able, impartial, and fearless judicial officer. There was no reason why he should not have been continued in the position which he so acceptably filled except that he is not a democrat. He was just such an officer as Mr. Cleveland would have gladly retained, if Mr. Cleveland had been honest in the professions he made when a candidate and bidding for the mugwump vote four years ago.—*Milwaukee Sentinel.*

No man who has studied into the history of the democratic administration and considers many of its official acts without prejudice, can come to any other conclusion than that for hypocrisy and sham, it eclipses anything ever before known in this country. The appointment of Elliott Sanford over Judge Zane is carrying out the same principle involved in the appointment of Judge West to the governorship of Utah in place of Governor Murry, whose administration had been singularly able and honorable. But because he had enforced the law against polygamy and had done all in his power to wipe out that dark and damning blot in Utah, he had incurred the displeasure of all Mormon polygamists, and when he was removed and Judge West was appointed, the Mormon cannon gave expression to the feeling among the polygamists, that Cleveland had done a wise thing in removing from office one whose administration had been hostile to the law-breakers of that territory.

But no one of sense can expect a better state of things than now exists at Washington. The administration won't be fair or even decent in some of its appointments. That it should appoint a Tammany politician to a judgeship over one who has raised the judiciary above all partisanship, is not to be wondered at. It is on a par with thousands of other appointments the administration has made while professing that public office is a public trust.

AN ELASTIC CONSCIENCE.

Congressman Scott, of Pennsylvania, was one of the leading spirits in the St. Louis convention. He is not only a democrat in all that the word implies, but he is a millionaire and promises to give one million dollars to the democratic campaign. While he is crying for free trade he is using every means within his vast power to impose burdens on the poor. Says the Pittsburg Gazette: "Mr. Scott is the moving spirit of the coal ring, has millions invested in corporations and is a practical monopolist of the most pronounced type. The recent advance of the price of coal 25 cents a ton is but a foretaste of what this coal trust will demand from the people as the season advances—an additional 25 cents a ton each month being determined on until the price reaches $9 or $10 a ton."

There was a time when Mr. Scott had some heart and conscience in his dealings with workingmen, but now he does not seem to have any. In 1870 there was a bill before congress to reduce the duty on iron. This was a democratic move. Manufacturers became alarmed at the attitude of the democrats in congress, and an earnest appeal was made to them to vote against the measure. Mr. Scott was then an iron manufacturer, and had in his employ hundreds of men. At that time Mr. Scott said: This large iron business has grown up under the protection afforded by our tariff laws, giving employment to thousands of employes and a home market for the products of our farms, stimulating industry in every department, adding to the comfort and wealth, and binding in harmonious interests our entire community. Why should this prosperous state of affairs be disturbed?"

But now that Mr. Scott has retired with an immense fortune he does not care what becomes of the iron industry, and he wants free trade in iron. Then he wanted protection to keep his shops open and his furnaces ablaze. Now he is more interested in the coal trust, one of the great monopolies of the country. This is the man who pledges to give a million that protection to home industries may go down to defeat.

The anarchists recently held a meeting in the city of Chicago. Mr. Buchanan, who is editor of the Labor Enquire, a radical socialistic organ, was the orator. He said: "No socialist or anarchist can endorse "protection." That protection is "oppression." That "free trade is necessary to the international brotherhood of man." The doctrine of the anarchists is, "that there should be no government, by law, but that the terms regulating all our human relations is a "universal brotherhood." Putting these two things together we find that the programme of the socialist and anarchists is to support free trade "because it is a step towards the distruction of government which they hate.

Mr. Buchanan also said "that the radicals," meaning the anarchists, "could not vote at the approaching election directly for free trade, but that under the circumstances the democratic party on the ground that a half a loaf is better than no bread." To vote for free trade is to vote with the anarchists. To vote prohibition helps the anarchist to carry out his infamous design. Let all that love America and American institutions vote the republican ticket.

Ex-Mayor and Ex-Congressman Jonathan Scoville, of Buffalo, who has been a democrat all his life, says: "The tariff is the sole issue of the campaign. Party lines are as completely swept away as in 1860 when there were no Whigs, no democrats, no republicans, and hundreds and thousands of democrats voted with the republicans on the slavery question.' He believes in protection, and says that thousands of protection democrats will vote the republican ticket. The democrats will not be able to muzzle their "free-trade cranks" this year for the chiefest of the sinners stands at the head of their ticket. The issue is Harrison or free trade.

There is not a newspaper in England that does the republican party and its platform and candidates decent justice. Not only has the treatment of Mr. Blaine been an international outrage the British tone towards the republican party is one of insolent and brutal and supercilious opposition. The information of British editors about the leading men in the United States was not remarkable for accuracy, but they knew enough to know the importance of Mr. Blaine and to jump upon and abuse him as the most representative and distinguished of American citizens.

The Philadelphia North American quotes the following from a letter from a life-long Virginia democrat: "If all of Harrison's supporters will do as much for him as I have already done, Cleveland won't get a vote in the United States, for three democrats have promised to vote for him, and they will do it."

The wool growers of New York state are as decidedly opposed to the Cleveland free trade outrage as are the wool growers of Ohio. But unfortunately the flock-masters of New York state have the rotten democracy of New York city to contend with, and this is the element that has overcome the republican party in the state many times.

The greatest objection the democrats can and against General Harrison is that he is the grandson of a man who was once president of the United States.

A LITTLE AMUSEMENT.

THE doctors are using nitro-glycerine as a medicine. They seem determined that no a single patient shall escape.

"In what condition was the patriarch Job at the end of his life?" questioned a teacher of the stolid-looking boy at the foot of the class. "Dead," was the quiet response.

"Oh, doctor," said an anxious mother to the family quarantine, "what can you do for my boy? He sits around the house and wants boiled chicken all the time." "There is nothing very serious the matter, madam. The boy has a foul stomach, that is all. Give him a few egg for a change."

MURAT HALSTEAD, of the Cincinnati *Commercial Gazette*, was asked the other day what novelty he discovered in his European travels last year, which impressed him most forcibly. "It was the jugs in Ireland," said he, "which will never stand on end, and must therefore be emptied or corked."

THAT was an ungallant urchin in Newton, Kan., who, if report does not wrong him, directed six feminine voters seeking the polls to one of Uncle Sam's letter-boxes. The women appear to have implicitly trusted the facetious gamin, as they deposited their ballots in the box and modestly stole away.

"How do you feel with such a shocking-looking coat on?" said a young clerk of some pretentions one morning to an old farmer. "I feel," said the old farmer, looking at him steadily with one eye half closed, as if taking aim at the victim—"I feel, young man, as if I had a coat which has been paid for—a luxury of feeling which I think you will never experience."

"WIFE, I wish you could make pies that would taste as good as my mother's used to." "Well, my dear, you run out and bring in a pailful of water and a hodful of coal and an armful of wood, just as you used to do for your mother, and may be you will like my pies as well." He concluded the pies would do just as they were.

"ONE o' my hired men has got a notion he wants a fiddle," said an agriculturist to a Boston dealer. "What might that second-hand one in the winder be worth?" "That's a Stradivarious; it's worth $3,000." "I'll speak to the hired man about it," shouted the agriculturist, as he backed out of the place. "He may not like that make."

"GRAN'MA," said a sweet boy of nine years, "how old are you?" "About sixty-six," said the grandmother. "You'll die soon, won't you gran'ma?" "Yes, dear, I expect to." "And when I die, gran'ma, can I be buried side of you?" "Yes, dear," said she, as her heart warmed toward the little one, whom she folded closer in her arms. "Gran'ma," softly whispered the little rogue, "gimme ten cents."

Water, Water, Water.

Now is the time to subscribe for water, for the Water Co. will lay but a few more services from the main to the fence line free of charge. Soon a charge of twelve dollars will be made for what the company is now doing free. The water prevents sickness, saves labor, keeps the grass green, lays the dust and cools the atmosphere. Office open every afternoon and from seven to eight o'clock in the evening.

NOTICE.

Owing to the retirement of W. B. Britton from the firm of Britton & Kimball and the absolute necessity of closing all the old accounts; all persons knowing themselves indebted to the firm are kindly requested to call and make settlement as the old firm's matters must be settled without delay.

KIMBALL & HALL.

Life is a joy forever when you keep stomach and bowels in order by taking Vinegar Bitters

Meeting of National Educational Association, San Francisco.

The next annual meeting of the National Educational Association of the United States will be held in San Francisco, Cal., from July 17th to 20th inclusively, and the Chicago and Northwestern Railway Co. offers a special inducement of a rate of one fare for the round trip to all persons desirous of visiting California at that time. Tickets will be sold from June 14th to July 13th inclusive, and will be good for return passage any time within ninety days from date of sale. Circulars containing full information can be obtained by applying to or addressing any ticket agent of the Chicago and Northwestern Railway Co.

HARRISON IS ILL.

The Republican Nominee Suffering from Overwork.

NO OCCASION FOR ALARM, HOWEVER.

In Spite of His Sickness He Addresses Two Hundred Pilgrims from Cincinnati—A Democratic Rally at Indianapolis.

UNDER THE WEATHER.

INDIANAPOLIS, Ind., July 16.—General Harrison has been suffering with severe pains in his side and bowels which confined him to his bed the greater part of Sunday. Some uneasiness was naturally occasioned in the General's household at his illness, and Dr. Jameson, the family physician, was summoned and found the General suffering severely from acute pain, but remedies were applied which quickly relieved him, but it was not until late in the afternoon, however, that he arose. Dr. Johnson says there is no occasion for alarm, as the General has a splendid constitution and his general health is excellent. All he wants is a little rest. Altogether the week just closed has been a trying one. Seven organized bodies, representing more than 6,000 voters, called upon him. He not only shook hands with each of these men but he addressed each of the seven bodies in speeches distinctively different in style and matter. The General, by advice of his physicians, spent a quiet Sabbath at home, and succeeded in getting much rest.

In spite of his illness on Saturday the General received at his residence about 200 members of the Lincoln Club of Cincinnati. In reply to an address by Mr. Walsin, vice-president of the club, General Harrison spoke in the highest terms of praise of Senator John Sherman, and said, referring to the contest at the Chicago convention:

"If the principles which are being urged by our party in these contests are worthy of our campaign enthusiasm and ardor, they are worthy to be thought of and advocated in the period of inter-campaign. They affect the business interest of our country, and their full adoption and perpetuation we believe will bring prosperity to all our individual and social and community interests. Therefore I think it wise that in these times, when men's minds are more open to conviction and are readier of access, you should press upon the attention of your neighbors, through your club organizations, these principles to which you and I have given the allegiance of our minds and the devotion of our hearts."

DEMOCRATIC HOOSIERS.

INDIANAPOLIS, Ind., July 16.—The local Democracy held an enthusiastic demonstration in honor of Cleveland and Thurman Saturday night. The streets for the distance of seventeen squares, along which the line of march extended, were thronged with people—men, women and children—and travel was at a standstill except for the marching clubs for nearly an hour, even the street cars being stopped by the dense mass of people. On every corner calcium lights were burning, flags were flying from the windows of the business houses and residences, and thousands of Cleveland and Thurman pictures were displayed. A fair estimate of the number of persons who participated in the parade as club organizations would fix it as not less than 6,000. At Tomlinson Hall, where 10,000 people had gathered, Hon. W. H. English presided. Governor Gray spoke briefly, characterizing Thurman as a man of honor and integrity, whom the Democracy could cordially support. Speeches were also made by ex-Senator McDonald and Congressman Brown.

NATURAL GAS EXPLOSION.

Five Men Injured by a Violent Explosion at Washington, Pa.—Buildings Shaken and Windows Smashed.

PITTSBURGH, Pa., July 16.—A natural gas explosion occurred at Washington, Pa. A party of workmen were making a connection on Prospect avenue, and arrangements had been made for turning on the gas at a certain time, but by some mistake the gas was turned on just as the workmen had made their fire for the heating of the pipes. A fearful explosion which shook the town and shattered glass in the adjacent buildings was the result. At the moment of the explosion the flames covered an area of 100 square feet and sprung up to the height of 75 feet. Five workmen were seriously burned.

Killed by a Train.

CHICAGO, July 16.—John Bates, said to be Chicago's oldest inhabitant, was instantly killed by a Baltimore & Ohio train at the foot of Thirty-sixth street. He was walking on the railroad track and being deaf did not hear the approach of a train on the track next the one on which he stood. Just as the train reached him he stopped in front of it and was killed. Mr. Bates was one of the original settlers of Chicago, having come here in 1832.

Injured by an Explosion.

CINCINNATI, July 16.—A battery of eight gas tanks in Ludlow, Ky., exploded and injured fifteen men, four of them fatally. The gas is generated from naphtha for lighting the railroad shops and for use in the Mann boudoir cars. The escape of a small quantity from one tank caused an explosion which exploded the other seven.

His Fate Sealed.

COLUMBUS, O., July 16.—The State Board of Pardons has refused to recommend the case of "Blinky" Morgan to the Governor for either pardon or commutation. This practically seals his fate and he will hang August 8.

Saw-Mills Burned.

QUEBEC, Can., July 16.—La Francelere's saw-mills at Louisville, the largest in the Dominion, were burned, together with a quantity of lumber and uncut logs. The damage will amount to at least $100,000, partially insured.

How Veterans Are Being Cared For.

WASHINGTON, July 16.—During the fiscal year the Pension Office issued 113,087 pension certificates. The number of original pensions granted exceeded that of any previous year by nearly 5,000.

Big Canadian Saw-Mills Burned.

QUEBEC, Can., July 16.—La Francelere's immense saw-mills at Louisville burned. A large number of logs were lost. The damage it is expected will reach $100,000; partly insured.

Not a Candidate.

WASHINGTON, July 16.—William R. Morrison authorizes a denial of the report that he intends to run again for Congress this fall in the Eighteenth Illinois district.

Mr. Blaine to Sail August 1.

LONDON, July 16.—A dispatch from Mr. Blaine says that he will sail for home August 1, and that he has engaged passage on the City of New York.

Editor Reid Meets with Loss.

WHITE PLAINS, N. Y., July 16.—Whitelaw Reid's house on the Ophir farm, three miles from here was burned. The loss is estimated at $300,000.

Sackett's Arnica Salve.

The best salve in the world for cuts bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains corns, and all skin eruptions, and positively cures piles, or no pay required It is guaranteed to give perfect satisfaction, or money refunded. THE COILS TIGHTENED.

The Burlington Conspirators in a Bad Box.

BOWLES, ONE OF THE SUSPECTS, SQUEALS.

Scared at the Evidence Produced Against Himself and His Fellows. He Makes a Clean Breast of the Plot.

BOWLES WEAKENS.

CHICAGO, July 16.—In an interview with District-Attorney Ewing, Bowles, one of the alleged dynamite conspirators, made a full confession, and the trial before Commissioner Hoyne was adjourned till Monday, Bowles waiving examination and being placed under $5,000 bonds.

The testimony adduced Friday at the trial of Broderick, Bowles, Wilson, Bauereisen, Goding and Smith was of such a nature that it showed that the Burlington road had been doing some very hard work and had at least come into possession of damaging facts. It was evident from what transpired that the prosecution thinks that the strongest case is against Broderick, Bowles and Bauereisen. From remarks which the attorneys let fall there seems to be no doubt that Wilson is a detective. Kelly, it is admitted, drew $40 a month from the brotherhood as Hoge's secretary, all the time being employed by the detective agency at a salary of $60 a month. It is stated that it was from him that the company first got their evidence. Smith was confronted with this, and, by dint of considerable suasion, moral and otherwise, was induced to make a clean breast of what he knew.

THE DEFENDANTS.

The court-room was filled at an early hour with much of the same kind of an audience as were there Friday, sturdy-looking engineers, as then, predominating. The distinguished-looking Commissioner was in his seat promptly at 10 o'clock. When all was ready United States District Attorney Ewing arose and said that Bowles desired to waive further examination. This brought Donahue to his feet with an announcement that he desired to say a word. Before he could say it, however, Commissioner Hoyne asked Bowles what he had to say, and Bowles replied that he waived examination.

The district attorney then moved that in the interest of public justice, the case be continued to Monday morning. The court asked the prisoner if he desired bail and he said he did, and it was fixed at $5,000. Attorney Donahue, for the defense, opposed the motion for a continuance and the court asked the district attorney if the ends of public justice demanded it. Mr. Ewing replied that they did; and then Bowles rose, and advancing a few steps, said in a voice trembling with emotion: "I speak in the interest of public justice, and to show that I am an innocent man." He then lost control of his feelings, and, bursting into tears, put his handkerchief to his eyes and took his seat. The Commissioner then adjourned court to Monday morning at 10 o'clock, and the spectators filed slowly out.

Bowles was subsequently closeted with District Attorney Ewing and Inspector James H. Bonfield. He expressed a desire that General Manager Stone should be present, and then he exposed the entire workings of the strike, and the important part Hoge and Murphy played in it. The most startling feature of all is that Bowles implicated men who have not heretofore been suspected, but who are employed by other roads. He gave names, data, etc., that startled even Mr. Stone, who thought that he knew the ramifications of this conspiracy. During his statement Bowles told Mr. Stone that he was delegated one night to lay dynamite on the track near Aurora, but when he got to the point his heart failed him as he thought of the consequences that might result, and he threw the cartridges into a stream. "My conscience has overcome me as I realize the enormity of this thing," he said in his statement. "If I could only recall the past. It breaks my heart and nearly drives me crazy to think of the harm I might have done. No, Hoge was not directly implicated in the dynamite plots, but he well knew what was going on, and knew perfectly well where I was getting the dynamite. I rendered my bills, and they were paid through the headquarters of our division of the Brotherhood of Locomotive Engineers, and every officer at the head of that division was cognizant of what I and others were doing. I have no desire to conceal one thing. My bills for dynamite were paid out of the brotherhood treasury, and Mr. Hoge approved the bills." Bowles gave names of parties, but for obvious reasons the names will not be made public.

District Attorney Ewing said yesterday that Bowles contemplated his confession on Saturday night, and that it did not differ materially from the statement made when he outlined the case in court on Friday.

More arrests in connection with the dynamite conspiracy are expected to-day or early in the week, both in this State and in Iowa.

The complaint against Stewart E. Hoge, chairman of the Grievance Committee of the Brotherhood of Locomotive Engineers, and J. H. Murphy, chairman of the Grievance Committee of the Brotherhood of Firemen, came up for hearing before Justice Lyon at the Harrison Street Police Station. The defendants are charged under the Merritt law with conspiracy to do malicious mischief to the property of the railroad by issuing a circular addressed to certain members of the order directing certain acts to be done. The case was continued until Monday.

As more light has been thrown on the work of the conspirators, railroad men begin to talk. When the news circulated that Bowles was going to confess all he knew, the men began to shake their heads and think. A member of the Brotherhood said: "If in any manner Chiefs Arthur and Sargent are brought into this matter, and they are not released on bail, then there will be a general strike throughout the country. Even if this trial of Hoge should prove unsatisfactory to the men and he is scattered and convicted, then there will be a general strike."

As soon as the trial of Hoge is over, and should he be convicted, there will be a meeting of all brotherhood unions and other organizations connected with the railways. There is no doubt that if these trials should take a serious turn and the brotherhood get the worst of it, then all the roads in the country will be tied up.

THE GRANT FUND.

The United States Trust Company Placed in Possession of $240,000.

NEW YORK, July 16.—George Jones, editor of the New York *Times*, and the executor of Oliver Hoyt, has paid into the custody of the United States Trust Company the Grant fund, amounting to about $240,000. The action was taken in pursuance of the wishes of the subscribers to the fund, expressed at a meeting held at the office of Oliver Hoyt on October 22, 1885, two months after the death of General Grant. When the fund was raised it was invested in Wabash bonds, and the Grant heirs drew 7 per cent. from them. On the reorganization of the Wabash road cash was received for the bonds, and it is now in the hands of the United States Trust Company for reinvestment.

A Town to Be Destroyed.

ORLANDO, Fla., July 16.—The State has resolved to adopt heroic measures to stamp out the so-called yellow or malarial fever at Plant City. The place is nearly deserted, and is strictly quarantined. The orders are that the entire place is to be burned, including all the buildings, furniture, bedding, etc. This is conceded to be the safest and most economical plan in the end. The infected will also be closely guarded by the South Florida health boards till the first frost falls.

Six Persons Drowned.

FORT SMITH, Ark., July 16.—Six persons—three men and three women—were drowned while crossing the Arkansas river near this city. Their names were John Logan, Jess Morris, Tom Davis, Sallie Jackson, Mary Pettis and Carrie Davis. The party had been attending a dance and were on the way home. When in the middle of the stream the boat upset. The bodies have not yet been recovered. All leave families.

Gigantic Timber Frauds.

WASHINGTON, July 16.—The Commissioner of the General Land Office has received a telegram from the special timber agent on duty at Eureka, Nev., to the effect that he had mailed reports of depredations on the public timber by two corporations amounting to $10,000,000. Efforts to prevent appropriations to carry on these investigations, he said, should be checked.

A Remarkable Escape.

CINCINNATI, July 16.—At Coney Island, ten miles up the river from Cincinnati, Samuel Young made an ascent of 1,000 feet in a hot-air balloon, and let go to make a decent in his parachute. The parachute for 900 feet did not open, and he went down into twenty-five feet of water in the river and sank to the bottom. When he came up he got tangled in the parachute, but was rescued by boatman unhurt.

A Bastard's Work.

DETROIT, Mich., July 16.—A passenger train on the Grand Trunk railroad was thrown off the track near here by a misplaced switch, the work of an unknown wrecker, for whose arrest a reward of $500 is offered. The fireman of the engine was killed, a lady passenger was seriously injured, and the other passengers were badly shaken up.

Funds for the Campaign.

WASHINGTON, July 16.—It is reported that Congressman W. L. Scott, of Pennsylvania, has subscribed $1,000,000 to the Democratic campaign fund; that Mr. Brice, of Ohio, and Herman Oelrichs, of New York, are down for $500,000 each; that the rich men of Tammany pledge $500,000, and that Edward Cooper is prepared to donate $100,000.

Shot at Her Son and Killed Herself.

BLOOMVILLE, O., July 16.—Mrs. Charles Ridgely, about 50 years old, in a fit of temporary insanity secured her son's revolver and failing in an attempt to shoot him, for some fancied wrong, she turned the weapon upon herself, sending a bullet into her neck and another through her heart. Death ensued almost instantly.

Business Failures.

NEW YORK, July 16.—The reports to *Bradstreet's* of business failures number 150 in the United States last week, against 149 last week and 146 this week last year. Canada has 27 this week, against 10 last week. The total of failures in the United States January 1 to date is 5,559, against 5,389 in 1887.

The Debeers Mine Horror.

CAPE TOWN, July 16.—The fire in the Debeers mine in Kimberly, is still burning. Five hundred and three persons have been rescued from the pit. All hope of saving any others has been abandoned.

Natalie Leaves Germany.

WIESBADEN, July 16.—Queen Natalie, under peremptory orders from the German authorities, took the train for Vienna. She was accompanied by the few attendants and servants who are left to her.

A Costly Blaze.

AVON, Mass., July 16.—A fire which started in the shoe factory of G. F. & L. G. Littlefield destroyed the factory, together with a number of other buildings, entailing a loss of nearly $70,000.

A WARNING.

The modes of death's approach are various, and statistics show conclusively that more persons die from diseases of the Throat and Lungs than any other. It is probable that everyone, without exception, receives vast numbers of Tubercle Germs into the system and where these germs fall upon suitable soil they start into life and develop, at first slowly and is shown by a slight tickling sensation in the throat and if allowed to continue their ravages they extend to the lungs producing Consumption and to the head, causing Catarrh. Now all this is dangerous, and if allowed to proceed will in time cause death. At the onset you must act with promptness; allowing a cold to go without attention is dangerous and may lose your own life. As soon as you feel that something is wrong with your Throat, Lungs or Nostrils, obtain a bottle of Boschee's German Syrup. It will give you immediate relief.

Life is a joy forever when you keep stomach and bowels in order by taking Vinegar Bitters.

BITS OF INFORMATION.

Special Telegrams Boiled Down for the Benefit of the Hurried Reader.

Governor Morehouse declares that he will not again interfere in the Maxwell case.

David Anderson was shot and killed by some one in ambush near Mount Sterling, Ky.

The Cincinnati Ice-Machine Company of Cincinnati has assigned. Liabilities, $150,000; assets, $100,000.

At Marietta, O., John Morriam was killed by the premature discharge of a cannon which he was loading.

Frank Tascott and John Carlson, two miners, were killed by a premature fall of ore at Wakefield, Mich.

H. & F. Boehme, of Newport, Ky., contractors, have made an assignment for the benefit of their creditors. Liabilities, $50,000; assets, $75,000.

Two brothers named Reedy made fun of a sickly young man named Williams in Lexington County, S. C., and Williams shot and killed them both.

The harvests in Hungary have been ruined and much other property has been damaged by heavy storms. Numbers of people were killed by hail-stones.

Measures looking to the enforced use of the Russian language in the German preparatory schools in the Baltic provinces are to be taken by the Russian Government at once.

Mrs. Elizabeth Rutter, returning from Utah to her home in England, tells a story of horrible outrages perpetrated by Mormons. She says her husband was secretly killed because he attempted to leave the community.

THE POPE IN EARNEST.

Another Letter from the Holy Father Denouncing the Plan of Campaign.

DUBLIN, July 16.—A Papal encyclical letter was read Sunday in all the Catholic churches in the diocese of Dublin. In it the Pope says he has heard with regret that excited meetings have been held at which inconsiderate and dangerous opinions regarding the recent Papal decree have been uttered, even the authority of the decree itself being impaired. He has seen with pain forced interpretations put on the decree and statements made that it was prepared without a sufficient inquiry having previously been made. The Pope, strongly denying this assertion, says the decree was based upon the most complete information; that previous to issuing it he had conferences with Irish Bishops on the subject, and sent a tried and trusted delegate to Ireland to inquire into and report on the true condition of affairs. His Holiness reiterates his affection for the Irish people, and says he has always urged them to keep within the bonds of justice and right. He refers to a communication to Cardinal McCabe in 1881, adding:

"As the people were led on with gradually increasing vehemence in the pursuit of their desires, and as they were not wanting those who daily fanned the flames, the degrees became a necessity."

The Bishops, he says, must remove all misconception and leave no room for doubt as to the force of the decree. The whole system of the plan of campaign and boycotting is condemned as unlawful.

A letter from Archbishop Walsh, of Dublin, which accompanied the Pope's letter, was also read. The Archbishop says:

"The agitation referred to is now under the resolutions recently adopted by the Bishops. The hope has arisen within the last few days that before the close of the present session Parliament will provide for the more urgent needs of the hour. The people may await in peace fuller legislation at the next session."

The encyclical letter is dated June 24. It causes intense dissatisfaction. As they people left the church during the reading of the letter.

CELEBRATION AT MARIETTA.

The Commemoration of the Establishment of St. Clair's Government Begun.

MARIETTA, O., July 16.—Great numbers of people attended the opening of the centennial celebration. A special car brought up the Cincinnati exposition commissioners, accompanied by Hon. Amor Smith and others. Governor Foraker presided at the exercises in Centennial Hall. The address of the day was made by the Rt. Rev. Bishop Gilmour, of Cleveland. Bishop Gilmour spoke with careful, distinct enunciation and without manuscript of "Religion and Civil Government," treating the subject in a broad, popular spirit. He held that government comes from God; the form is from the people. To-day the centennial opens with a grand salute and parade, addresses during the day, and an address by Mrs. Livermore in the evening. Senator Evarts will deliver an oration Tuesday.

In the House.

WASHINGTON, July 16.—The House, by a vote of 141 to 57, insisted on its disagreement to the Senate mail subsidy amendment to the Post-Office Appropriation bill, and a new conference was ordered. The remainder of Saturday's session was devoted to a discussion of the wool clause in the Tariff bill.

Want to Hear the Big Guns.

ST. LOUIS, July 16.—A local benevolent organization is trying to bring about a big tariff debate in which Carlisle, Blaine, Waterson, McKinley, Foraker, Cox and Mills may engage.

THE MARKETS.

Grain and Provisions.

CHICAGO, July 14.

Of all Things in the World

A tonic is what nervous people require. To impart strength into the nervous organism is to insure its tranquility, provided causes of unhealthful excitement are avoided. A medicinal tonic that—like Hostetter's Stomach Bitters—commands the unqualified sanction of the healing profession, and which institutes a general reform in a bilious, dyspeptic and debilitated condition of the system, is surely entitled to a careful trial by intelligent people, capable of forming a due estimate of a medicine, from emphatic and often recorded professional evidence in its behalf. Not only are the nerves and stomach invigorated by the Bitters, but the system is also endowed with unwonted power of resistance to influences in air, water or daily avocation subversive of health. Prominently dangerous among the first named of these is malaria against which Hostetter's Stomach Bitters affords a competent safeguard. Rheumatism and kidney troubles are also prevented and overcome by it.

One cent a day.
THE CHICAGO DAILY NEWS
announces the reduction of its price from Two cents to ONE CENT per copy.

IT is fitting that the pioneer of low-priced journalism in the West should lead in placing the American newspaper of to-day upon the basis of the lowest unit of American coinage. Twelve years ago that unit was the nickel in Chicago and throughout the Northwest. The founding of THE DAILY NEWS at a lower price was regarded by the journalistic profession as inviting certain failure. But they were wrong. To-day there is not a nickel paper in Chicago, and the circulation of THE DAILY NEWS averages, as shown by its published sworn statements, 175,000 copies a day—with a single exception the largest daily circulation in America, and greater than the circulations of *all other Chicago dailies combined.*

THE DAILY NEWS has prospered beyond the most sanguine hopes of its founders. For this it has more than once made its grateful acknowledgments to an appreciative public. It believes, however, that the time has now come when, acting entirely within the limits of a wise commercial progression, it can give its thanks more practical expression. It proposes henceforth to "divide" as to its friends—and to multiply as to its circulation. To-day it reduces its price to *One Cent*—and expects to double its circulation.

And anticipating the questionings of the doubtful let it be briefly said that *the thing can be done.* THE DAILY NEWS—all that it has been in the past, as well as all that is rightly expected of it in the future as a leader in progressive American journalism—can be produced and sold for *one cent a day,* and this by reason of those common principles of trade which make possible lower prices just in proportion as the aggregate volume of sales increases. THE DAILY NEWS now sells *over a million papers a week,* as shown by its published sworn statements of circulation, and it can afford to sell at a smaller profit per paper than other Chicago dailies, no one of which has as much as one-third the average daily circulation of THE DAILY NEWS. The large addition to its present million-a-week circulation, which will surely come with its reduction to *one cent a day,* will fully compensate for the reduced profit at which each paper is sold. All this concerns the reader only as assuring him that THE DAILY NEWS can reduce its price and at the same time maintain its high character as the foremost newspaper of the Northwest—that a million-a-week circulation makes the otherwise impossible entirely possible.

The present is peculiarly the time to inaugurate this popular departure in American journalism. The approaching Presidential election widens immeasurably the field and opportunity for THE DAILY NEWS as an independent, impartial, fearless newspaper—one free from all the entanglements of mere partisan allegiance. The demand is more and more for a newspaper which shall give all the political news free from partisan coloring, and which shall tell the absolute, unvarnished truth about things, regardless of its effect upon the fortunes of this or that political party or candidate. This demand THE DAILY NEWS aims to meet, and at its reduced price it combines all the elements which should make it literally everybody's paper.

To the thousands of new readers whose attention is now for the first time directed to THE DAILY NEWS it is proper to say that they will find it complete in all the essentials of the best American journalism of to-day. Its quality as a *newspaper* proper is best indicated in the fact that it is the only low-priced paper in Chicago or the North-west, which is a member of the "Associated Press." The other "Associated Press" papers in Chicago, the *Tribune,* the *Times*-and *Inter-Ocean* all cost three cents. THE CHICAGO DAILY NEWS prints *all the news* and sells it for *one cent a day.* Sold by all news dealers. Mailed, postage paid, at $3.00 per year, or 25c. per month. Address VICTOR F. LAWSON, *Publisher,*
THE DAILY NEWS, CHICAGO.

OH! MY HEAD.

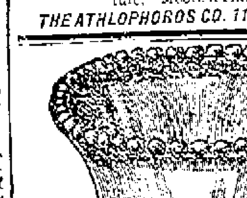

The pain from Neuralgia and its companion disease Rheumatism is excruciating. Thousands who could be quickly cured are needlessly suffering. Ath-lo-pho-ros will do for others what it did for the following parties:

Williamsport, Ind., Oct. 3, 1887.
Having been afflicted with neuralgia for the past four years, and trying almost everything, but in vain, I finally heard of Athlophoros. After taking one bottle I found it to be helping me, and after taking four bottles of Athlophoros and one of Pills, I found that I was entirely well. I think the medicine is positively a sure cure.
CHAUNCEY B. REDDICK.

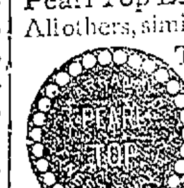

Mt. Carmel, Ill., Dec. 26, 1887.
I have used Athlophoros in my family and find it to be the greatest medicine for neuralgia in existence and having had its fangs fastened upon me for the past 30 years I know whereof I speak. MRS. JULIA CHILTON.

Send 6 cents for the beautiful colored picture, "Moorish Maiden."

MONDAY, JULY 16.

FIRST TO ACCEPT.

Candidate Streeter Says He is Willing to Run.

TEXT OF HIS LETTER OF ACCEPTANCE.

The Nominee of the Union Labor Party Explains His Views on Matters of Public Policy—The Rock on Which the Party is Built.

STREETER ACCEPTS.

CHICAGO, July 16.—Following is the letter of acceptance of A. J. Streeter, nominated for President by the Union Labor party in Cincinnati, May 15:

"NEW WINDSOR Ill., June 30.—*Hon. J. W. Goshorn, Chairman, and Robert Schilling, Secretary National Executive Committee*—Gentlemen: Your favor of June 20 to hand, giving notice of my unanimous nomination by the Union Labor party at its National convention, held in the city of Cincinnati, O., May 15 and 16 last for the office of President of the United States, and with this notice you also send copy of platform. I am truly thankful for this distinguished honor. To be nominated for the highest office in the gift of the people is more than I expected, and more than I deserve, and would have been pleased had the convention conferred this distinguished honor upon another more worthy than myself.

"But it has come to me free as the air and the sunlight, and I deem it a duty I owe to both the convention and the people there represented to accept the nomination, and if it shall be the will of the people to elect me there will be some radical changes made in the administration of affairs. And to the extent of my ability and energy, and with a firm hand, the Government will be administered more in the interest of the great common people, but not to the injury of any class of our people, for all should be equally protected in their person and property by the firm hand of the law. But the great common people—those whose hands have made this country what it is—have not had justice.

"Unfortunately, it is the Government itself that has brought the people to the condition they are in, struggling with poverty and debt. Through bad laws and their wicked enforcement corporate monopolies, greedy combinations and avaricious trusts have become favored classes in the administration of affairs, and those have forced the people into their present and unfortunate condition. They now cry aloud for relief, and it is the duty of the Government to help them instead of further aiding the privileged classes to their injury. I hold to this principle: The prosperity of a Nation is measured by the prosperity of its industrial people. If they are prosperous, then the Nation is prosperous, indeed; but if its producing people are struggling with poverty, taxes and debt, then the Nation is poor, though its treasury, like ours, be overflowing with idle money.

"Such is the condition of our Nation to-day. They tell us the country is growing rich, but the farmers and other working people are growing poor. Did our fathers ordain and establish this Government to be a machine to enrich the few at the expense of the many? I think not. But on the contrary, the true intent of law and of government should be to protect the weaker members in society from the encroachments of the stronger.

"The stronger are better able to care for themselves, but the weaker need the fostering care of the Government, and hence governments are instituted among men. This fundamental principle has been subverted, and in lieu of it we have a Government of the capital class, now merged into a moneyed aristocracy. If elected no recommendation will be made to demonetize silver again; nor will the Secretary of the Treasury advise the destruction of the remaining greenbacks in circulation. The law for the coinage of silver will be enforced in the interest of the people, and instead of coining the minimum amount of $2,000,000 per month the maximum amount of $4,000,000 per month will be coined. We need more money in circulation, and the coinage of silver should be as free as that of gold. Instead of so much talk about idle money in the Treasury, that department of the Government should be conducted on business principles—bonds called, the money paid out and the interest stopped. I am advised that the act creating the 4 per cent. bonds was tampered with, and time of payment changed in the interest of the bondholders; and this after the act had passed Congress.

"We know the people did not do this thing and if changed, it must have been the work of the bondholders or their agents.

"I deem it good law that the bondholders should not reap a benefit from their unlawful acts; and such bonds should be called and paid at their face value.

"There is something wrong, and we all know it. We have tried a change of Administration from one old party to the other, but it gave the people no relief. We are even worse off now than when the change was made. Still interest, taxes, high rates for transportation, and other combinations take nearly all we annually produce, and leave but little on which to live and less to pay debts.

"A Government that does not aid its industrial and working people to pay their debts is not a Government of the people and is unworthy of their support. A Government that has by its policy tolerated monopolies, greedy combinations and trusts, and has not protected the people against their spoliations is unworthy the support of its working people. Unfortunately these unholy monopolies, combinations and trusts have increased in number and power and strength from one Administration to another, and until they think they have the power to control the Government and the people; until they have forced upon the country another 'irrepressible conflict'—a conflict involving the prosperity and happiness of 60,000,000 of people. It is an 'irrepressible conflict' that will determine whether capital shall rule this country or the people who inhabit it.

"The other 'irrepressible conflict' involved the liberty of 4,000,000 of people, but this one involves the right and liberty of 60,000,000 of people to the enjoyment of the fruits of their toil. To settle the slavery contest it cost the Government a deal of money, of life and of sorrow, and it is to be hoped that this conflict may be settled peacefully at the ballot-box, and by the restoration of the Government to the people, to whom it belongs. But settled it will be, and let us hope without seas of fire and rivers of blood. Hence it is the part of wise statesmanship to look this growing conflict square in the face, and to make such changes in the laws and the administration of the same as will restore confidence and prosperity to the people.

"Such is the object and intent of the Union Labor party.

"If either old party had given relief then there would be no necessity for the Union Labor party. But both have been tried and both have failed. We see people leaving their old parties every day and going to some new organization, and these changes are a vigorous protest against the wrong-doing of the old parties. Some are still saying, let us reform within our old party, but that is a hopeless task.

"For history has no record of a political party that ever reformed within itself. It takes a new organization to do that, and that is what we are doing. The tariff is a minor issue when compared with the greater issues involved, and so complex as to be difficult for many to understand.

"No legislation whatever on the tariff will give cheaper rates for transportation, nor cheaper rates for interest on money, nor protect the people against the increasing combinations, monopolies and trusts now sapping the prosperity of the people. Owing to the great diversity of opinion on the tariff and among all parties, the Cincinnati convention thought it best at this time to leave that question out of the platform.

"I believe, however, that there should be a revision of the tariff laws, and that protection should be given where needed and the tax reduced wherever it can be safely done.

"We are a temperance party, in favor of good government, better morality and a higher Christian civilization. Believing, as I do, that cheap tobacco and whisky are not in the interest of better morals and a higher civilization, but the reverse of it, I am opposed to the removal of the Government tax on these commodities. Such would be a retrograde movement of demoralizing tendencies, and would lead thousands of young men into the gutter and degradation. We are the friends of the soldiers, too. Not in a sectional sense, to antagonize the blue and the gray. No. But, forgetting the past, let us plant freedom's flag upon the hilltops of every State, and concede to all the same patriotic devotion to our flag, our country and our hopes in a higher civilization. The Union Labor party will deal justly and liberally with its citizen soldiery.

"The platform says arbitration should take the place of strikes and other injurious methods of settling labor disputes. That is right. Labor strikes are unprofitable and often failures and disturbers of business. Laws should be enacted to compel the employers and employes to submit their disagreements to arbitration.

"Corporate capital is sometimes arrogant and relies too much on Pinkerton's militia. The very sight of this force irritates the working people when in trouble and has a tendency to widen the breach between capital and labor. In Illinois we pay a large tax to maintain an efficient State militia and police force, and why this force of private militia have their headquarters in Illinois is more than I can tell. Their services should be dispensed with by State authority. I will not discuss the platform generally, but the land plank, opposing monopoly in land, demanding the forfeiture of unearned grants, limitation of land ownership, etc., meet my hearty approval.

"The ownership or control of lines of communication and transportation is demanded by the people. A National monetary system in the interest of the people instead of speculators in money is good. Equal pay for equal work, for both sexes, is justice. The platform is good, as a whole, and meets my approbation.

"In conclusion will say I will observe my duty to those who were pleased to put me in nomination; will hold their banner aloft until the ides of November shall have come, and until the last vote shall have been counted. I am truly yours. A. J. STREETER."

BOULANGER RECOVERING.

The Wounded French Duelist Progressing as Favorably as Could Be Expected—Anniversary of the Fall of the Bastile.

PARIS, July 16.—General Boulanger is improving. Several friends called upon him and the General was able to converse with them. He was also able to take bouillon. His breathing is less labored and the wound in his neck is satisfactory.

The taking of the Bastile was celebrated throughout France. In this city patriotic societies, accompanied by bands and carrying banners, marched to the Strasburg statue and deposited wreaths upon it. The patriotic League, headed by MM. Deroulede, Laguerre, Laisant and Susini, was received with mingled cries of "Vive Boulanger," "Vive La France" and "Vive La Republique." After leaving the Strasburg statue, the societies visited the monument to Gambetta and the statue of Joan of Arc, which they also decorated with flowers. M. Deroulede, in depositing a wreath upon Gambetta's monument, said: "We started from the statue of the Republic, we visited the statue of Strasburg, and we now confront the monument of the great patriot. Our pilgrimage has been more expressive than speeches. We know whither we are going—for the Republic, for Alsace-Lorraine—vive Boulanger!"

A NEW CABLE.

The Prospects Good for a Submarine Telegraph Line Across the Pacific.

CHICAGO, July 16.—Statements made by Matthew H. Gray, a well-known engineer who has been on a visit to Dr. George R. Ghiselin, of this city, indicates that the laying of a telegraph cable across the Pacific Ocean will soon begin. Mr. Gray was sent to Vancouver, B. C., Australia and other countries with which it is desired to secure cable connections as the representative of the Silverton Submarine Cable Company of London to investigate as to the feasibility of the scheme, and he carries back a highly favorable report. It is therefore considered certain that the cable will be laid. It will run from Vancouver to some point in Australia, and is expected to cost £3,000,000 to £4,000,000. Mr. Gray sails from New York for England to-day to make his report, and it is thought operations will begin at once. The Canadian Government and people have interested themselves in the undertaking, as it is believed that such a cable would be of great commercial value to the Dominion. Property in Vancouver has materially advanced in anticipation of its influences.

A Cowboy's Daring.

HUTCHINSON, Kan., July 16.—A cowboy walked into the Bank of La Junta and covering Rufus Phillips, the cashier, with a revolver, ordered him to drop all the funds of the bank into a bag he placed on the counter. The cashier complied with alacrity, and the daring robber at once mounted his horse and escaped. The amount of the loss is variously estimated at from $16,000 to $28,000. There is no clew to the robber.

Mr. Bancroft Hurt.

NEWPORT, R. I., July 16.—While George Bancroft, the historian, was walking on the piazza of his cottage he fell and rolled down the steps, and it is feared his injuries will confine him for some time. He was soon to fall, and help was soon at hand. His physicians says no bones are broken, and that no serious injury has been sustained.

Fine Crop Prospects in Iowa.

CEDAR RAPIDS, Ia., July 16.—Crop reports from all stations on the Burlington, Cedar Rapids & Northern show the rye harvest is on with a full yield. Oats are badly lodged by the late storms, but will be an average crop. Corn has grown prodigiously the past week, and is vastly ahead of last year's prospects at this time.

Kentucky Contractors Assign.

CINCINNATI, July 16.—Messrs. H. & F. Boehme, of Newport, Ky., the well-known contractors, made an assignment to Edward Wendt for the benefit of their creditors. The liabilities are about $50,000, and the assets about $75,000.

Three Young Men Drowned.

BALTIMORE, Md., July 16.—A yawl containing ten excursionists capsized off North Point. Frank Veasax, aged 27; William Finn, aged 30, and Joseph Lutz, aged 27, were drowned. The bodies were not recovered.

Electric Bitters.

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise. A purer medicine does not exist, and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the Liver and Kidneys, will remove Pimples, Boils, Salt Rheum and other affections caused by impure blood. Will drive Malaria from the system and prevent as well as cure all Malarial fevers. For cure of Headache, Constipation and Indigestion, try Electric Bitters—entire satisfaction guaranteed, or money refunded. Price 50 cents and $1 per bottle at F. Sherer & Co's Drug Store.

A Collie Dog's Sagacity.

The other day Mr. Nicoll, cattle salesman, Coatbridge, sold at his mart there a collie dog, which had recently been transferred from Forfar. The collie was bought by a Coatbridge flesher, and shipped from Glasgow to a friend at Buncrana, in the north of Ireland. The latter duly acknowledged receipt of the dog, but in a day or two wired to Coatbridge that the animal had disappeared. Soon after the dog entered the shop of the Coatbridge flesher who had dispatched him, having crossed the Channel again on one of the steamers. The animal was, however, again sent to his new master at Buncrana, but he evidently had no taste for Irish soil, as he was in a day or two thereafter again found at the flesher's in Coatbridge. The remarkable thing is that the collie should have twice boarded the right boat at the crowded pier at Londonderry, and shown a greater partiality for Coatbridge than even his old habitation in the North.

Is Consumption Incurable?

Read the following: Mr. C. H. Morris, Newark, Ark. says: "Was down with abscess of lungs, and friends and physicians pronounced me an incurable consumptive. Began to take Dr. King's New Discovery for consumption, am now on my third bottle, and able to oversee the work on my farm. It is the finest medicine ever made."

Jessie Middlewart, Decatur, Ohio, says: "Had it not been for Dr. King's New Discovery for consumption I would have died of lung troubles. Was given up by doctors. Am now in best of health." Try it. Sample bottles free at F. Sherer & Co's. drug store.

I have been afflicted with catarrh for 20 years. It became chronic, and there was a constant dropping of mucous matter. It extended to my throat, causing hoarseness and great difficulty in speaking, indeed for years I was not able to speak more than thirty minutes, and often this with great difficulty. I also, to a great extent, lost the sense of hearing in the left ear, and of taste. By the use of Ely's Cream Balm all dropping of mucous has ceased and my voice and hearing has greatly improved.—Jas. W. Davidson, Attorney at Law, Monmouth, Ill.

SPECIAL TAX NOTICE.

Notice is hereby given that a warrant for the collection of a special assessment for paving advertising, engineering and curbing West Milwaukee street from the west end of the bridge to the east line of High street in the city of Janesville, is now in my hands for collection, and that I will receive the same at my office until the 10th day of August, 1888, after which I shall proceed to collect the same as the law directs.

M. MURPHY, City Treasurer.

Dated July 8, 1888.

SPECIAL ASSESSMENT.

NEW SOUTH CHEAP HOMES and Big Investments in the South. 2,060 Choice Farms, Mills, Factories and Business Opportunities. 2,250,000 Acres of Timber and Mineral Lands. Write for Free Descriptive Pamphlet to R. L. FUNKHOUSER & CO., Hagerstown, Md.

DRUNKENNESS Or the Liquor Habit, Positively Cured by Administering Dr. Haines' Golden Specific.

It can be given in a cup of coffee or tea without the knowledge of the person taking it; is absolutely harmless, and will effect a speedy and permanent cure, whether the patient is a moderate drinker or an alcoholic wreck. Thousands of drunkards have been made temperate men who have taken Golden Specific in their coffee without their knowledge and to-day believe they quit drinking of their own free will. IT NEVER FAILS. The system once impregnated with the Specific, it becomes an utter impossibility for the liquor appetite to exist. For sale by FRANK SHERER, Druggist, 42 W. Milwaukee St., Janesville, Wis.

BELOIT COLLEGE AND ACADEMY

MOXIE Nerve Food. This is a liquid food to strengthen and build up the overtaxed nervous system. It will relieve old drinkers of the thirst for liquors, though it is neither a medicine nor a stimulant. It cures nervousness and mental exhaustion at once if not from inflammation. The Moxie Nerve Food plant was first discovered in South America by the late Lieut. Moxie, and first given to the public by Dr. Augustine Thompson, leading physician of Lowell, Mass.

THE CITY GOVERNMENT.

A Special Meeting of the Common Council to Consider the Water Works Test.

Plans and Programme Adopted for the Official Test of the Plant To-Morrow.

The Street Railway Company Called on to Answer a Little Legal Conundrum.

Mayor Winans convened the common council in special session on Saturday evening for the purpose of considering matters pertaining to the water works test. All the aldermen answered the roll call except Aldermen Judd and Smith.

Mayor Winans in the chair, stated that the meeting had been called to consider the arrangements necessary for the water works test to take place on Tuesday. The chief engineer of the fire department had prepared a plan and programme for the test which he deemed a proper one and if there was no objection he would instruct the clerk to read it.

The clerk read as follows:—

The common council, with such committee as the council may appoint, shall assemble at the council chamber at 9 o'clock on the morning of Tuesday, July 17th, and satisfy themselves that the water plant has been constructed in accordance with sections 3, 4 and 5 of the franchise ordinance.

Test No. 1.—1,000 feet of hose, taking water from the hydrant at the corner of Harrison and Milwaukee avenue, laying the hose east on Milwaukee avenue.

Test No. 2.—10:15 a. m, 2,000 feet of hose, by extending the hose of test No. 1, east 1,000 feet. While this test is being made a stream must be played from the hydrant in front of No. 1 engine house, through 200 feet of hose; and a stream in front of No. 2 engine house through a line of 200 feet of hose.

Test No. 3.—11:15 a. m., concentrate four streams on the high school building. Take water from two hydrants nearest the building on South Third street, and two streams from the two hydrants nearest the building on South First street. Each stream through 400 feet of hose.

Test No. 4—Six streams through 800 feet of hose. Concentrate three streams on the Myers house at the corner of Main and East Milwaukee streets, by running a line of hose from the hydrant in front of Kimball and Hall's furniture store, on West Milwaukee street; a line of hose from the hydrant on North Main street, third from East Milwaukee street; a line of hose from the hydrant at the corner of South Main and Court streets. Concentrate three streams on the Congregational church, at the corner of South Jackson and Dodge streets, by running a line of hose from the hydrant at the corner of South Academy and Dodge streets, two lines of hose from the two hydrants at the corner of South Jackson and Center streets.

Test No. 5—Ten streams through 100 feet of hose each.

First—Hydrant at corner of Division and East Milwaukee streets.

Second—Hydrant at corner of North Bluff and East Milwaukee streets.

Third—Hydrant at corner of Myers house, East Milwaukee street.

Fourth—Hydrant at corner of North Main and Milwaukee streets.

Fifth—Hydrant at east end of Milwaukee street bridge.

Sixth—Hydrant infront of Kimball & Hall's, West Milwaukee street.

Seventh—Hydrant at corner of North River and West Milwaukee streets.

Eighth—Hydrant at corner of North Franklin and West Milwaukee streets.

Ninth—Hydrant at corner of North Jackson and West Milwaukee streets.

Tenth—Hydrant at the corner of North Highland West Milwaukee streets.

The six stream test will be maintained for 20 minutes under maximum pressure. All other tests will be for 15 minutes.

Taking it for granted that our highest building is 80 feet, the water company will be required to attain that height with each of the six streams through 800 feet of hose, the distance to be ascertained by placing a water gauge on an open hyrant on each side of the river, the same to show a pressure of 95 pounds

All these tests to be conducted under the personal charge of Henry Blunk, chief engineer of Janesville fire department, who in case of accident or any unforseen circumstance, may alter any of the tests except Nos. 4 and 5. Tests Nos. 1, 2 and 3 being made for the sole purpose of testing the "ability of the water company to furnish a plentiful supply of water for extinguishing fires."

ORDERED, By the Mayor and common council that the chief engineer of the fire department be directed to require the fire department or as many as in his judgment he may deem necessary, to turn out on Tuesday, July 17th, and assist in making the above tests.

Ald. Fathers—I see there is no provision made for a stand-pipe test, which I should think ought to be made, as much dependance is placed on the stand pipe. I move therefore, as an amendment, that a stand-pipe test follow all of the direct pressure tests. Adopted.

[By reference to the general order issued by Chief Engineer Blunk, it will be seen that he has arranged for a test of the stand-pipe pressure at Harrison street, through 1,000 feet of hose, and through 2,000 feet of hose; also a stand-pipe test at the high school building with four streams. After consultation it was deemed proper to make this change, as the above tests of the stand-pipe were deemed sufficient for all practical purposes.]

Ald. Fathers: I see by the plan that we are to appoint a committee to act with the council in making the test: After consulting with several aldermen, I have prepared a list of names of such committee, two gentlemen from each ward, and have included the members of the old board of water commissioners, who I think should be appointed. I therefore move that the following committee be appointed to act with the common council:

First Ward—James A. Denniston and James Shearer.

Second Ward—John J. R. Pease and John O. Spencer.

Third Ward—B. B. Eldredge and Edward Ruger.

Fourth Ward—M. M. Phelps and S C. Cobb.

Fifth Ward—J. G. Wray and Ed. S. Hayward.

The motion was adopted.

Ald. Horn, instructing the chief engineer to employ as many members of the fire department as he may deem necessary to assist in making the water works test on Tuesday, at an expense of $2.50 per day each. Adopted.

Mayor Winans stated that he had received word from the mayor of Ripon, Wis., that the mayor and common council of that city would be here on Tuesday next to witness the test, as that city was talking of putting in water works. Mayor Winans suggested it would be a proper thing for the people or city council to appoint a committee and show such bodies visiting the city in an official capacity some attention.

Ald. Norris stated that he had agreed to notify the mayor and common council of Monroe of the time of the official test, and on his motion the clerk was instructed to telegraph the notice to the mayor of Monroe.

Ald. Horn stated that a delegation from the common council of Oshkosh, including the chief of fire department and chief of police, would be here to witness the test.

Ald. Baker moved that a committee of three be appointed to entertain such visitors as may come here next Tuesday, making such arrangements as the committee deemed proper. Adopted, and the mayor appointed as such committee Alds. Conrad, Baker and Hanthorn.

Ald. Norris stated that the Street Railway Company had torn up certain streets in the fourth and fifth wards, in the removal of their track leaving them in bad condition. He moved that the street commissioner be instructed to repair the streets and that the expense of said repairs be charged up to the Street Railway Company. Also that the city clerk inquire of the Street Railway Company by what authority they abandoned the Monterey extension of the street car line. Adopted.

Mayor Winans informed the council that he had sold the $12,000 issue of city bonds, receiving a premium of $125.

Ald. Horn stated that the chief engineer in his last report to the council, recommended the purchase of two light wagons for the fire department, to be used in exercising the department horses in order to save the wear and tear on the hose carriages. Ald. Horn moved that the committee on fire and water be authorized to purchase two light wagons for such purpose.

Ald. McLean stated that he did not agree with Ald. Horn. Frequently the department teams were taken out exercising at some distance from their houses when alarms occurred and they had better be on the carriages than compelled to return to the houses for the hose carriages. He also understood that when the water works were accepted the chief engineer intended to leave less hose on the carriages, carrying 700 feet instead of 1,000. This would make comparatively a light load.

Ald. Horn thought it better to pay $45 for a light wagon than $600 for a hose carriage.

Ald. Baker thought that the hose carriages would not wear out very fast if they were oiled properly.

There being no second to Ald. Horn's motion no action taken.

Mayor Winans called the attention of the council to the lamp post which stood directly in the center of the sidewalk in front of Frank Webster's store. It was not only unsightly, but inconvenient and dangerous. It should be moved either to the right or left or on the opposite side of the street.

On motion of Ald. Conrad the matter was referred to the Gas Light committee.

Ald McLean moved that when the council adjourned it to be to Wednesday evening of next week, at eight o'clock to take action on the acceptance of the water works. Adopted.

On motion of Ald McLean the council adjourned.

CROPS LOOK WELL.

Rock County Farmers Blessed with Good Fortune.

From all parts of the country reports come in that farmers are confident of a good harvest. So far, although the season has been somewhat late, crops have done remarkably well. This is especially true of the small grain, notwithstanding recent storms which have left some fields more or less lodged.

The tobacco is coming up finely. Growers have been successful in getting out the intended acreage of the new crop which is now coming forward under very favorable weather. The outlook is certainly much better than a year ago this date.

Corn, which replaced tobacco on many fields is also doing well and promises an excellent harvest. On the whole, Rock county farmers are justified in laying off "that tired feeling" until some other season and replacing it with what is left of the '85 smile.

THE JOHNSTOWN ACCIDENT.

A Word of Explanation From Mr. Nelson Cole.

To the Editor.

There seems to be some wrong impression on the part of many, in regard to my connection with the unfortunate accident that happened to the son of John Kelly by a mower on the 5th, instant and on my place.

I ask in simple justice to myself, that I may be allowed a few wyrds of explanation. In the first place, the lad was not in my employ at the time of the accident occurred and was not in the field at my request. In the second place, I did not ask the boy to run ahead of the sickle and strike with a stick the off horse that was lagging behind. Instead of this, I asked him to throw a pebble at the horse which he could have done without any danger. The lad however, thinking, as he states, that the sickle was on the other side ran quickly forward with a little bunch of grass in his hand to throw at the horse. In doing so, to my horror and surprise he ran directly in front of the sickle, and not two feet from it, when the machine was in motion. Seeing his danger I stopped the team as soon as I could. The lad however had turned and faced the sickle and was struck by the guards before the machine could be stopped. This tripped him and he fell over the sickle to the rear, and as he fell the sickle severed his left foot across the ball. I caught the boy as he fell and carried him some forty rods to my house and summoned Dr. and Mrs. Rockwell who arrived within eight or ten minutes, and myself and family did all all we could do under the circumstances for the sufferer. In view of the above facts I deny the charge of criminal carelessness or carelessness at all. It was an accident pure and simple and like all accidents the people so ready to find fault are very wise when it is all over. Nobody regrets the accident more than myself. I show my sympathy by paying the doctors' bills and meeting other expenses to make the poor boy comfortable Not that I consider myself legally bound to do so, but from motives of humanity and because the affair happened on my premises.

I will only add that the lad is doing well under the skillful treatment of Dr. Rockwell and that the neighbors have all been very kind.

NELSON COLE.

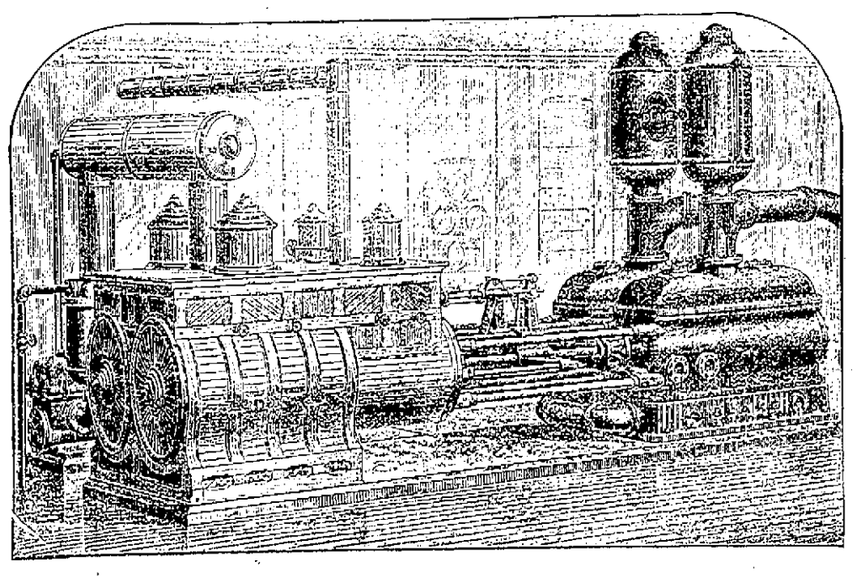

THE JANESVILLE WATER WORKS.

Some Interesting Items Concerning the Franchise and Magnitude of the Plant.

Valuable Data for Those Who Take an Interest in the Test on To-Morrow.

Many Interesting Questions Answered by Perusing this Column of Facts.

The fact that the Janesville water works are now completed and ready for the official test on to-morrow, anything relating to the plant, its construction, cost, capacity, etc., will be of interest to the general public. The Gazette has, therefore, given much space to the water works to-day, in order that the readers may be thoroughly posted. The following facts relating to the works were obtained from Mr. Geo. A. Rawson, of the firm of Turner, Clarke & Rawson, owners of the works, and can be relied upon as correct.

ONE OF THE BLAKE PUMPS, SAME AS USED BY THE JANESVILLE WATER WORKS.

The franchise was granted to Messrs. Turner, Clarke & Rawson, of Boston, Mass., on the 10th day of May, 1887, the conditions of the franchise being well known to the readers of the Gazette.

The contract for the construction of the plant was then let to the Wisconsin Construction Co., of which Mr. Geo. A. Rawson is the president; A. B. Turner the treasurer; J. E. Dodge, the secretary and B. R. Clarke the engineer. The laying of the pipe or water mains was sub-let to Mr. Carrol E. Gray, Jr.

THE PUMP HOUSE.

The pumping house, located on the bank of the river on South River street, below Galena street, is a red brick building with a handsome fire proof slate roof. The building is 74x38 feet, fronting on River street. The engine room is 34x36; the boiler room 37x36; height of engine room 13 feet 9 inches; height of chimney 80 feet with a ten foot base and five foot four inch top, the flue being two feet ten inches square. The chimney foundation is boulder gravel, concrete and two courses of sandstone of large dimensions, the same being 14x12 feet. The architect of the building is Ernest N. Boyden, of Boston; the builder, Mr. L. M. Bishop, of Holyoke, Mass. The pumping house is furnished inside in a very handsome manner, and presents a clean and pleasant appearance.

The pumping house is connected with the city fire alarm system by a 12-inch gong. It is contemplated to put a steam whistle on the pumping house, to be used in case of fire.

THE PUMPS AND ENGINES.

There are two pumps of a combined capacity of over 4,000,000 gallons in 24 hours. The pumps were made by the Geo. F. Blake Manufacturing Co., of New York and Boston, and are known as compound duplex condensing with inside plungers. The diameters are as follows:

High pressure cylinders, 14 inches.
Low pressure cylinders, 28 inches.
Water cylinders 14 inches.
Length of stroke, 18 inches.

They have the condensers and an independent air pump, but are so arranged that they can be run non-condensing. The temperature of the feed water averages 150 degrees F., The foundations of the engines is brick masonry, capped with Berea stone. A very fine illustration of one of the pumping engines is published in this paper.

THE BOILERS.

There is a battery of three boilers rated at 80 horse power each. They are 16 feet long and 60 inches in diameter, and contain 58 4-inch flues each. The boilers were made by the S. Freeman & Sons, of Racine, Wis. Mr. Geo. E. Parkhurst, the expert engineer, (whose name appears on the casing of one of the engines) representing the Geo. F. Blake Co., is certainly deserving of much credit for his painstaking and thorough work as shown in the pumping house machinery and its surroundings. He has been ably seconded by Mr. Geo. W. Spickler, who is to be the engineer at the station.

THE RESERVOIR.

The reservoir or storage basin is located on South River street directly opposite the pumping house. It is 71x90 feet on the bottom and holds at 11 feet depth 790,000 gallons. The sides slope 1½ to 1 foot. The embankment is 10 feet wide on top. The bottom and a portion of the sides are covered with 8 inches of concrete and the wall of the embankment reaches to within 3½ feet of the surface of same. The sides are paved with sandstone. The screen house is a brick structure located at the inside toe of the east embankment and is 12 feet square. Through this house and its copper screens passes the storage supply of water which is only used in case of a heavy draught for domestic or fire purposes.

THE STAND PIPE.

The stand-pipe is located on the corner of Caroline and Walker streets, second ward, and is of iron, 85 feet high and 25 feet in diameter. It was built by Messrs. Tippett & Wood, of Phillipburg, New Jersey. The foundation rests upon boulder gravel and is composed of solid masonry sandstone. Is 32 feet in diameter at the bottom and 28 feet at surface, four courses two feet thick. The capacity of the stand-pipe when full is 312,198 gallons, or 3,673 gallons per foot in depth. Weight of water when full, 1300 tons. An automatic valve which closes by a sudden increase of pressure produced by speeding the pumps is located in a valve well at the base of the stand-pipe. This valve is closed in case direct pressure is required for fire purposes. The stand-pipe is surmounted by a handsome crown, and is painted a granite or grey color.

THE PIPE LINE.

The franchise calls for thirteen miles of pipe line, varying in size from six to 20 inches, excepting the hydrant connections, which are four inches. The company has laid pipe as follows:—

Four inch—hydrant connections	2133.10
Six inch	1699.75
Eight inch	1418.08
Ten inch	6881.12
Twelve inch	1269.70
Sixteen inch	2793.37
Total length in feet	29661.35

or thirteen miles and 24.65 feet, not including the Monterey line, which is 2614 feet in length. The pipe was furnished by the Cincinnatti and Newport Iron and Pipe Co., and the Donaldson Iron Co. There are on the whole line 120 gates or valves which were furnished by a firm in Troy, New York. There are one hundred and eighty fine hydrants, double nozzle, which were manufactured by the Coffin Vale Co., Boston.

There are three river crossings; one at Racine street, 8-inches in diameter; one at Center street, 12-inches in diameter; one at Fourth avenue, 8-inches in diameter. That at Racine and at Center streets were put in by Messrs. Thacher & Breyman, of Toledo, Ohio, and that at Fourth avenue by the water company. The Racine and Center street crossings are submerged in the water, resting on the river bottom, while that on Fourth avenue is placed in a double box and surrounded by lampblack, which is used as a non-conductor of either heat or cold. The box is attached to the side of the bridge by suitable braces.

SOURCE OF SUPPLY.

The supply of water is obtained from an artesian well which was put down under the supervision of the board of water commissioners previous to awarding a franchise to the water company, Mr. W. E. Swan being the contractor. The well is 1087 feet deep and 8 inches in diameter. The pressure at the surface is 12½ pounds per square inch, and the well delivers 580 gallons per minute, or 835,200 gallons per 24 hours. The analysis of this well by Prof. E. G. Smith, of Beloit, proves it to be the best available source for the city, and "as compared with the supply of other cities of this vicinity, the quality of the well will bear any critical comparison." The temperature as it comes from this well is 55 degrees the year round. In regard to the constancy of the flow it is demonstrated that the well was flowing into and out of the storage basin during the winter of '87-'88, and the valves controlling this flow were not changed after being once adjusted for some two months, and no appreciable variation in the depth of the water in the basin was observed.

The general supervision of the construction of the plant has been in charge of Mr. J. Frank Williams, civil engineer and so well has he satisfied his principals that he has been appointed the general superintendent of the Turner, Clarke & Rawson water works system embracing six different plants: Janesville and Racine, Wis.; Plattsmouth Nebraska: Helena, Montana; Salem, Ohio; and Old Orchard, Maine. Mr. Williams is now at Helena and cannot be present to witness the test to morrow. Mr. T. T. Croft is the local superintendent and will have charge of the test to-morrow, representing the water company. Mr. Geo. A. Rawson is also in the city. One of the pumping engines at the pumping station bears the name of "J. Frank Williams."

IT WAS JANESVILLE'S DAY.

Oshkosh and Whitewater Ball Teams Badly Worsted.

The Oshkosh and Whitewater young men who attempted to give Janesville pointers on base ball yesterday probably wish they had gone to Sunday school. The Oshkoshs were met on their own grounds by the Mutuals and were tied up in a small bundle to the tune of 15 to 5. George Wilbur pitched for the Janesvilles and Dougnerty caught.

The Whitewaters were treated to the same experience by the Gas House Stars except that the score stood 20 to 1.

THE WEATHER.

At seven o'clock yesterday morning the thermometer indicated 67 degrees above zero. Partly cloudy with east wind. At one o'clock p. m. the register was 88 degrees above zero. Partly cloudy with east wind. For the corresponding hours last year the register was 80 and 101 degrees above zero. At seven o'clock this morning the thermometer indicated 66 degrees above zero. Clear with east wind. At one o'clock p. m. the register was 84 degrees above zero Cloudy with south wind. For the corresponding hours one year ago the register was 83 and 103 degrees above zero.

THE WATER WORKS TEST.

General Orders for Conducting the Official Test of the Janesville Plant.

Issued by Chief Engineer Blunk in Accordance With Instructions from the Council.

The "official test" of the Janesville Water Works will take place on to-morrow, commencing at ten o'clock, and will be under the personal charge of Chief Engineer Henry Blunk, of the fire department. At the meeting of the common council on Saturday evening, a plan of the test was adopted, and Chief Blunk has issued the following general order to carry out that plan. The chief engineer desires that every one connected with the test in any manner will be promptly at his post, and attend to the duty assigned him on time without further orders. He thinks that if this instruction is followed, there will be no occasion for trouble or delay. The following is his order:

JANESVILLE, Wis., July 16th, 1888.

WHEREAS, The mayor and common council, at their meeting on Saturday evening last, placed the official test of the Janesville water works in my charge to be conducted in accordance with the plan and programme adopted by the common council at the same meeting, and it being necessary, for the success of such test, that all detailed arrangements so far as the fire department is concerned should be made to harmonize therewith, the following general orders are issued:

First:—The mayor and members of the common council and the special committee appointed to make the test, will assemble at the common council chamber on Tuesday, July 17th, at nine o'clock a. m. sharp, "and satisfy themselves that the water plant has been constructed in accordance with sections three (3,) four (4,) and five (5,) of the franchise ordinance." They will then repair to the corner of Milwaukee avenue and Harrison street, at which point the first test will be made, water being turned on promptly at 10 o'clock a. m.

Second:—Captain Eller will lay 1,000 feet of hose east on Milwaukee avenue, attaching the same to hydrant at corner of Harrison street and Milwaukee avenue, all connections to be made by 10 a. m.

Third:—Captain Ehrlinger will add 1,000 feet of hose to Captain Eller's line, laying the same east on Milwaukee avenue and making connections promptly at 10:15 a. m.

Fourth:—Captain Roof will attach a line of of hose to the hydrant in front of west side engine house, laying the hose north on North River street; he will also attach a similar line of hose to the hydrant in front of the east side engine house, laying the hose north on North Main street.

Fifth:—At 10:30 a. m. a signal of two taps on the engine house gongs and west side bell will be given, when the pumps at the pumping station will be started for the purpose of giving direct pressure; and the two hydrants named in paragraph four will be opened. One tap on the engine house gongs and west side fire bell will be the signal to stop the pumps and close the hydrants.

Sixth:—11:15 a. m.—Captain Ehrlinger will lay a line of 400 feet of hose from the hydrant at the corner of East and South Third streets, hose to be laid north on East street; also one line of 400 feet of hose from the hydrant at the corner of South First and East streets, south along East street, and have connections all made promptly at 11:15 a. m.

Seventh:—Captain Eller will lay a line of 400 feet of hose from the hydrant at the corner of South First and Wisconsin streets, south along Wisconsin street; also a line of 400 feet of hose from the hydrant at the corner of South Third and Wisconsin streets, north along Wisconsin street, having his connection all made at 11:15 a. m.

Eighth:—At 11:30 a. m. a signal of two taps will be given on the engine house gongs and west side fire bell, when the pumps will again be started and direct pressure applied to test of lines as named in paragraphs 6 and 7; at 11:45 a signal of one tap on the fire bell and engine house gongs will be given, when the pumps will be stopped and the hydrants closed.

Ninth:—Captain Roof will assist Captains Eller and Ehrlinger as the chief engineer may from time to time direct.

Tenth:—2:00 p. m.—Captain Eller will lay a line of 800 feet of hose from the hydrant at the corner of South Academy and Dodge streets; east along Dodge street, taking the first 200 feet of hose from his carriage; also a line of 800 feet of hose from the hydrant at the north corner of Center and South Jackson streets, north along South Jackson street, taking the first 300 feet of hose from the carriage; also a line of 800 feet of hose from the hydrant at the south corner of Center and South Jackson streets, taking the first 300 feet of hose from his carriage. The intention is to concentrate the three streams at the corner of Dodge and South Jackson streets, and placing 300 feet of the best hose at each hydrant.

Eleventh:—2:00 p. m.—Captain Ehrlinger will lay a line of 800 feet of hose from the hydrant in front of Kimball & Hall's furniture store, West Milwaukee street, east across Milwaukee street bridge, taking the first 300 feet of hose from his carriage; also a line of 800 feet of hose from the hydrant at the corner of Court and South Main streets, north along South Main street, taking the first 300 feet of hose from his carriage; also a line of 800 feet of hose from the hydrant in the middle of the block between North First street and Prospect avenue, south along North Main street, taking the first 300 feet of hose from his carriage. The intention is to concentrate the three streams at the corner of Main and East Milwaukee streets, and the placing of 300 feet of the best hose at the hydrants.

Twelfth:—3:30 p. m.—Captain Ehrlinger will lay five lines of hose of 100 feet each and attach to the hydrants at the corners of Division and East Milwaukee streets, North Bluff and East Milwaukee streets, South Main and East Milwaukee streets, North Main and East Milwaukee streets, and at the east end of Milwaukee street bridge, laying all hose on East Milwaukee street:

Thirteenth:—Captain Eller will lay five lines of hose of 100 feet each and attach to hydrants at corners of High and West Milwaukee streets; North Jackson and West Milwaukee streets; North Franklin and West Milwaukee streets; North River and West Milwaukee streets, and at Kimball & Hall's store, laying all hose on West Milwaukee street: Captains Eller and Ehrlinger will have all their connections made and turn on water promptly at 3:30 p. m. They will also leave one man at each hydrant to shut off water in case of accident.

Fourteenth:—During the direct pressure test at the high school building, and the six and ten stream tests, the common council and special committee or such members as they may select, will visit the pumping station and witness the movements of the pumps and engines.

Fifteenth:—Assistant Engineers Hutchinson and Osgood will assist the chief engineer as aids, and their orders will be respected accordingly.

It is desired to have all tests commenced promptly at the time named, therefore all officers of the fire department will set their watches in the morning with the correct time, and carry out their orders accordingly.

HENRY BLUNK,
Chief Engineer.

Supt. Croft and Mr. Rawson of the water works, have been in consultation with Chief Engineer Blunk this afternoon, in endeavoring to change the first test which is to take place on Milwaukee avenue, it being first on the programme, but up to the hour of going to press the chief engineer had not decided to make the change. Supt. Croft desires to have this test come last, or on some other day It has been arranged, however, to have an additional test on the part of the water company, which will take place after the ten stream test in the afternoon, by concentrating five streams at the corner of River and West Milwaukee streets, and five streams at the corner of Main and East Milwaukee streets. Also by throwing a fancy stream on the corner of River and West Milwaukee streets.

BRIEFLETS.

—Water works test to-morrow.

—Mr. George Parisle visiting friends in Indiana. He expects to be absent most of the week.

—Many Janesville people visited Clear Lake yesterday.

—Mrs. D. W. Watt has returned from a visit among friends in the east.

—Miss. Addie H. Best has returned from a visit with friends in Chicago.

—J. A. Donniston's bakery is being improved by the addition of a new brick oven of large size.

—Religious services were held at Crystal Springs yesterday afternoon by the Rev. Milton Wells of Center.

—Mr. and Mrs. G. W. Fish, of Pecatonica, spent Sunday with Mr. and Mrs. J. J. Hall of the second ward.

—Water takers have been warned that all water should be shut out of house-services during the test to-morrow.

—Mrs. W. H. Judd, who has been spending several days visiting friends at Fort Atkinson, returned home Saturday evening.

—E. S. Hatch and family, of Chicago, who have been guests at the home of Alderman J. P. Baker, left for Milwaukee this morning.

—Crystal Temple of Honor No. 32 assemble in regular weekly session this evening—lodge room in the Judd block, North Main street.

—Mr. and Mrs. E. W. Vanderlyn, of the first ward, returned from Clinton last evening. They were called to Clinton by the death of Mrs. James Vanderlyn.

—The Arion orchestra will give a social dance at Apollo hall on Thursday evening, July 19th. The public is cordially invited to attend. Tickets 50 cents.

—Shot guns will make themselves heard at the fair grounds to-morrow. The second annual tournament of the Angleworm Club will begin on the grounds at half past nine.

—Chief R. J. Wiesbrod, of the Oshkosh police force is in the city to-day. He was formerly chief of the Oshkosh fire department and will be present at the water-works test to-morrow.

—Capt. Edward Ruger will not be present at the water-works test to-morrow although his name appears on the committee. He has been detained by his duties at Sault Ste Marie.

—Rehearsals for the Good Templar theatricals one week from to-night are progressing rapidly. The rehearsals are being held at the opera house and give promise of an excellent entertainment.

—The Third Ward Blues defeated the First Ward Browns this morning by a score of 23 to 15. The batteries were Slightam and Williamson for the Blues and Larson and Zamzow for the Browns.

—The Rev. S. P. Wilder led a well attended temperance meeting at Cannon's hall yesterday afternoon. The meeting was full of interest, quite a number of local temperance workers taking part.

—Michael Craven was arrested to day for assaulting George Shaller with a pitchfork. The trouble grew out of a dispute regarding some trees in the fourth ward park. It will be given an airing before Judge Patterson to-morrow.

—Court Street M. E. Sunday school will picnic at Pope's springs Wednesday. The May Flower will make two trips, one at 9:30 in the morning and one at 1.30 in the afternoon. All members and friends of the church are invited. To those belonging to the Sunday school tickets will be free; to others twenty-five cents.

—The Bower City Band concert given in the court house park on Saturday evening, drew out large crowds of people of all classes. The streets adjoining the park were filled with people. The band executed the published programme in almost a faultless manner, and they received the hearty plaudits of the large gathering. It is hoped that arrangements will be made to have the concerts repeated each week during the summer season.

MANY HAPPY GRAN

Grand Master Carr Reports Wisconsin Farmers Strong for Harrison.

The Tariff Issue and How it is Received—Straws That Signify.

"What issue is being discussed most among Wisconsin farmers?" was the question handed out by a Gazette reporter to Grand Master S. C. Carr of the state grange.

Mr. Carr knows more farmers personally than any other man in the state, not even barring W. D. Hoard. His work as grand master of the Wisconsin grange keeps him constantly informed as to the sentiment among agriculturists in general, and his opinions are of value to correspond. When the reporter's question was repeated he responded with evident conviction:

"The tariff. It is being discussed very generally and very thoroughly."

"What is there to the claim that many republican farmers are dropping into the democratic ranks to work for free trade?"

"They have no foundation. At first quite a number of the farmers favored free trade. They have now come to see that without more or less tariff this country would go to the wall. As for the Mills bill, they look on that as almost equally dangerous because it removes the tariff on wool and on other farm products. They pronounce it the entering wedge of an attempt to help out the cities at the expense of the country. Farmers as a rule favor tariff revision but understand that any sweeping reduction is impracticable. As to whether or not sugar should be placed on the free list they are divided. The general opinion is, however, that so long as we can produce only one-tenth of the sugar we use, it would be better to pay domestic planters a cent a pound extra for their goods and remove the sugar tariff entirely."

"How do they stand on internal revenue?"

"As a rule they endorse the republican platform. They favor the tobacco clause, of course, because it would help them financially. Then, as regards the liquor question, most of them are really in favor of the temperance reform and think they see in the republican proposition the most practical way to get the liquor evil under control. It may be safely said that the republican vote among the farmers this fall will be larger than ever before."

BRIEFLETS.

—Building and Loan Association pay day to-day.

—O. C. Hellebrant has just arrived with a car load of the very best Texas ponies—very gentle to handle. Mr. Hellebrant can be found at Ryan's livery stable. Anybody wishing ponies call at the above place.

—A round dozen of prominent Milton families spent to-day in Judge Bennet's court, called there by the Miller divorce case. Mrs. Elizabeth Miller charges Robert Miller with being cruel to her in both language and manner. She asked for a divorce and for her share of his $35,000. There was very little contest as to the divorce half of the question, but Mr. Miller objected to the estimate placed on his property, and objected vigorously. He insisted that the estimate was much too large. Testimony on the property question occupied most of the afternoon.

—Justice F. M. Scanlan performed the ceremony Saturday afternoon, that united Mr. H. Watson, of the first ward, and Miss Amelia Taves, of the town of Rock as husband and wife. The wedding was at the home of Mr. and Mrs. Martin Zienows. The only guests were a few relatives and intimate friends of the happy couple. The congratulations that were extended were genuine and hearty, and all the influence that good wishes may have, Mr. and Mrs. Watson certainly possess. They will take up their home at once in the suite of rooms over Mr. Watson's recently purchased restauran on West Milwaukee street.

—Chief Engineer Blunk will use the fire bell to-morrow in giving orders relating to the water works test. No regular box number will be struck except in case of fire. His regular signals will be one tap on the bell, which will be the signal for the pumps to stop and to shut off the water from the hydrants; two taps on the bell will be the signal to start the pumps and open the hydrants. Other signals may be arranged between the chief engineer and the superintendent of the water works and the engineer at the pumping station.

NOTICE.

All parties using water will find it to their advantage to see that the "stop and waste" usually located in the cellar is turned to shut water off the pipes in the house during the test to-morrow.
